TECHNICAL DATA

How does it work?

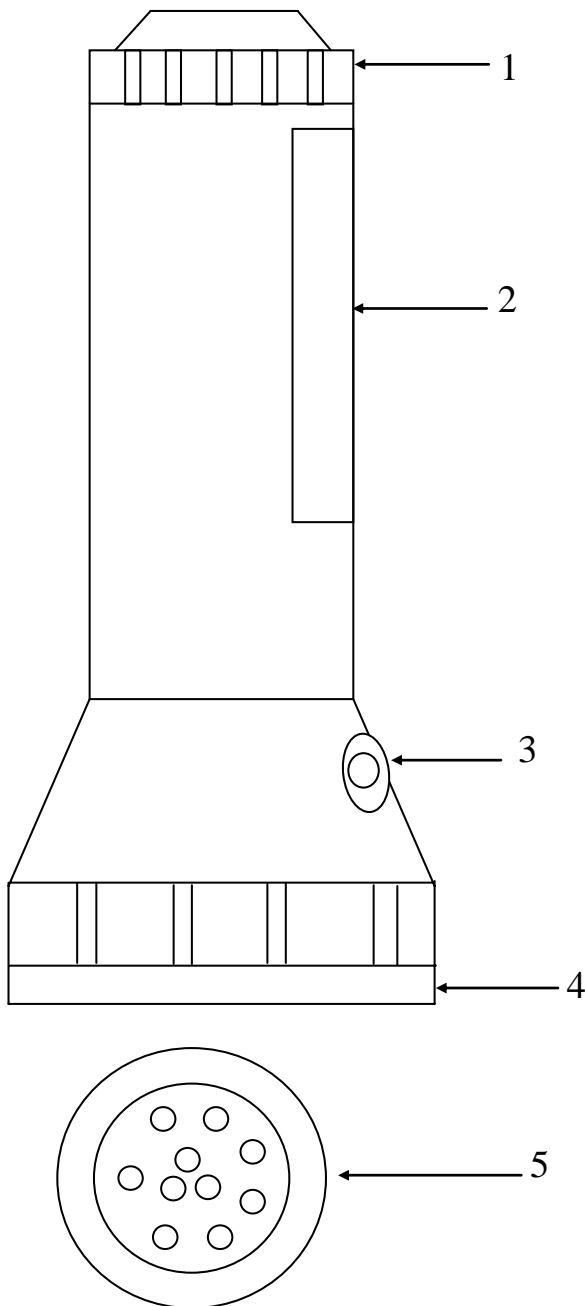

- ◆ The torch is powered by 0.40W monocrystalline solar panel which charges one Ni-Mh rechargeable battery (700mAh) - lifespan of 500 cycles
- ◆ The batteries power 10pcs of super bright Light Emitting Diodes- LEDs (17 lumens) with a lifespan of 100,000hrs.
- ◆ To power it, unlike with conventional torches, you just expose the solar panel to sunshine and you have all the power you need for free.
- ◆ With a charging time 8 hrs of sunshine it can be used for up to 6 hrs.

Advantages

- ◆ Once you buy it, you never have to invest in batteries on a regular basis. Its cheaper in the long run!
- ◆ It is Green product. It uses the freely available sun, a very clean source of energy .
- ◆ The torch is brighter, more durable and stylish than the conventional torch
- ◆ It's a must have for that camping expedition, for regular home use or for that emergency.

Operation

- ◆ Be sure to charge the torch for at least 6 hours the first time after you buy it.
- ◆ Charge by exposing the solar panel to sunshine (direct sunshine)
- ◆ To switch on/off, press the On/Off button once
- ◆ Protect the torch from moisture. Do not immerse this product in water
- ◆ Do not tamper with or attempt to remove/replace the batteries or LED lights.
- ◆ **Do not attempt to remove the back cover of the torch!**
